Objective

Seeking a new and challenging co-op position to learn new skills or an iOS mobile development co-op for the Summer of 2017.

Education

Rochester Institute of Technology – Software Engineering
Expected Graduation - May 2018

COURSES

Computer Languages, Development Processes, Data Structures, Design Patterns, Web Design, CS Theory, Engineering Secure Software, Usability, Requirements and Architecture

Experience

SOLEO COMMUNICATIONS, ROCHESTER, NY   6/8/2015 - 12/16/2015

Worked backend on a Java Spring web application, which included databases and system architecture refactoring. Also built a demo iOS app using my company's API for local business searching.

SOLEO COMMUNICATIONS, ROCHESTER, NY   5/23/2016 - 8/19/2016

Worked as a full stack iOS engineer working on an application derived from the previous application that was made by myself. Mainly worked on iOS but also worked a bit in Android Studio on the back end of the Android version.

Projects

SOLEO IOS APP/ HAYSTACK

Created a demo Swift iOS application that connected to my company's local search API to display local businesses based on a category or keyword. Was built to show what our API can do, if used correctly in the mobile space. Haystack is the redesign of the original app that I previously worked on. I worked on the UI update of the whole app, and worked on adding a map search with custom list view of the businesses searched.

Skills

LANGUAGES

Swift, Python, Java, HTML, Ruby, C

FRAMEWORKS

Django, Rails, Spring MVC, Foundation, Bootstrap

Extra Activities

Humans vs. Zombies	Aug 2013 - Present
Ukulele Club	Aug 2013 - Present
Society of Software Engineers Member	Aug 2014 - Present
Historian of Society of Software Engineers	Jan 2016 - May 2016
Technology Head of Society of Software Engineers	Aug 2016 - Jan 2017
RIT Singers & RIT Chamber Singers	Jan 2016 - Present
Pokémon TCG Competitor	Oct 2013 - Present
RIT Lifeguard	Aug 2013 - May 2016
SE Lab Assistant	Jan 2017 - Present
